WHY SHOULD YOU ATTEND?

The 7th International Workshop on HIV Pediatrics will continue to present a unique and much needed platform for international interchange on this important topic. The workshop consists of a 2-day program including invited lectures, abstract-driven presentations, panel debates and roundtable discussions. By bringing together experts from different disciplines who are involved in daily clinical care for infants and children, this meeting will offer an interactive setting where the latest developments in the field can be presented, discussed, reviewed and evaluated.

This workshop is an affiliated independent event of:
