WHY SHOULD YOU ATTEND?

The 10th International Workshop on HIV Pediatrics is the only conference that focuses on HIV Pediatrics on an international level. The 2-day program includes oral abstract and poster presentations, state-of-the-art lectures from invited speakers and more informal and interactive fora including debates and panel discussions. The workshop provides an interactive setting that provides a platform for presentation and discussion of the latest developments in the field, encourages young investigators to engage in the field of pediatric/perinatal HIV research, and stimulates new research activities and collaborations.
ABSTRACT SUBMISSION

Submit your abstracts for a poster or an oral focused on the following Topics:
- Prevention of mother to child HIV transmission (PMTCT)
  (including issues for HIV-uninfected, exposed children).
- Antiretroviral treatment of pediatric HIV infection.
- Complications of HIV and its treatment in children.
- Co-infections in HIV-infected children.
- Comprehensive pediatric HIV care.
- HIV infection and adolescents (perinatally and behaviorally infected)
- Implementation science research on PMTCT and pediatric treatment programs.

ABSTRACT SUBMISSION OPENS: 1 SEPTEMBER 2018

WHO SHOULD ATTEND?

Researchers, clinicians, and industry specialists working in academic settings, hospitals, and non-governmental organizations (NGO). The workshop explicitly supports participation of a diverse community of participants, including women, racial and ethnic minorities, and investigators from low and middle income countries and from a broad scope of disciplines.

The workshop brings together junior and senior investigators across a range of disciplines (pediatrics, adolescent medicine, virology, immunology, pharmacology, obstetrics/gynecology, epidemiology and behavioral sciences) to share learning and experience across the critical content areas including HIV treatment and management, drug development, prevention of mother to child transmission, co-infections and co-morbidities, pediatric cure research and implementation science.

Free registration for young investigators with accepted abstracts!
